

## Accessibility Audit and Plan 2019

This audit and plan covers all three main strands of the planning duty:

1. Physical access- improving the extent to which disabled pupils are able to take advantage of education and intervention.

The physical environment includes things such as steps, stairways, kerbs, exterior surfaces and paving, parking areas, building entrances and exits (including emergency escape routes), internal and external doors, gates, toilets and washing facilities, lighting, ventilation, floor coverings, signs and furniture. Aids to physical access include ramps, handrails, widened doorways, electromagnetic doors, adapted toilets and washing facilities, adjustable lighting, blinds, induction loops and way-finding systems.

Physical aids to access education cover things such as ICT equipment, enlarged computer screens and keyboards, concept key boards, switches, specialist desks and chairs and portable aids for children with motor coordination and poor hand/eye skills, such as extra robust scientific glassware and specialist pens and pencils.

2. Learning Access - increase the extent to which disabled students can participate and achieve within the schools' curriculum.

The curriculum covers a range of elements that includes ensuring that teaching and learning is accessible through school and classroom organisation and support, deployment of staff, timetabling, curriculum options and staff information and training.

Many adjustments to access will be dependent on individual needs.

3. Information Access to - improving the delivery of information to pupils with disabilities. Any students requiring additional support are clearly identified on entry to the school and throughout their career.

Those requiring specific support with communication are known by staff so their needs can be met in lessons through differentiation.

VI = Visually Impaired

HI = Hearing impaired

PI = Physically impaired
